Rivers of Life

Yosemite National Park and the High Sierra were the places closest to Ansel Adams' heart, and this magnificent new collection presents the finest selection of his photographs and writings yet published on this "vast edifice of stone and space." Inspired by their grandeur, their wildness, and their primeval mystery, Adams' photos came to represent America's National Parks. During his lifetime Adams published seven books of images from this region; this new book brings the best of these early volumes together into a single work. His writings - alive with anecdote and insight - provide a backdrop for these stirring images, and an introduction by John Szarkowski, the most distinguished photography critic and curator of his time, provides testimony to the enduring impact of Adams' Yosemite vision. Yosemite and the High Sierra represents Adams' legacy at its most distilled and timeless.

What would you do for five million dollars? Adam and Evia Langston have lived in their own little garden of Eden since the two married at the age of seventeen. Working their way up from the humblest of beginnings, the Langstons have thrived beyond anything they could have ever imagined. Now they live in the finest home, drive the best cars, and indulge in all the trimmings that signify their massive success. But then the recession hits and rips apart the family's financial stability. Unable to support their three children and other relatives, Adam and Evia find themselves drowning in financial trouble and teetering on the brink of complete disaster. With nowhere to turn, the Langstons have no idea what to do. Until Shay-Shaunté, Evia's multimillionaire boss, comes to the Langstons with a five-million-dollar offer that seems so hard to refuse. Will the Langstons make this deal? Or will they recognize that the glitter of five million dollars may be far from gold?

Around the World in 80 Tales

Our critically acclaimed smash hit *Cartographies of Time* is now available in paperback. In this first comprehensive history of graphic representations of time, authors Daniel Rosenberg and Anthony Grafton have crafted a lively history featuring fanciful characters and unexpected twists and turns. From medieval manuscripts to websites, *Cartographies of Time* features a wide variety of timelines that in their own unique ways, curving, crossing, branching, defy conventional thinking about the form. A fifty-four-foot-long timeline from 1753 is mounted on a scroll and encased in a protective box. Another timeline uses the different parts of the human body to show the genealogies of Jesus Christ and the rulers of Saxony. Ladders created by missionaries in eighteenth-century Oregon illustrate Bible stories in a vertical format to convert Native Americans. Also included is the April 1912

From surgery to vaccines, man has made great strides in the field of medicine. Quality of life has improved dramatically in the last few decades alone, and the future is bright. But students must not forget that God provided humans with minds and resources to bring about these advances. A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury. In Exploring the World of Medicine, author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God. The fascinating history of medicine comes alive in this book, providing students with a healthy dose of facts, mini-biographies, and vintage illustrations. Includes chapter tests and index.

H. P. Lovecraft's letters are among the most remarkable literary documents of their time, and they are a major reason why he has become

such an icon in contemporary culture. He wrote tens of thousands of letters, some of them of great length; but more than that, these letters are incredibly revelatory in the depth of detail they provide for all aspects of his life, work, and thought. This volume, first published in 2000, assembles generous extracts of Lovecraft's letters covering the entirety of his life, from childhood until his death. He tells of his youthful interests (poetry, Greco-Roman mythology, science), his childhood friends, and the "blank" period of 1908-13, after he dropped out of high school. He emerged from his hermitry in 1914 by joining the amateur journalism movement, where he became a leading figure and was involved in numerous literary and personal controversies. In 1921 Lovecraft became acquainted with Sonia Greene, whom he would marry in 1924. By that time, he had begun publishing in the pulp magazine *Weird Tales*. But his marriage was a failure: living in New York, he was unable find a job and found the teeming city so different from the tranquility of his native Providence, R.I. Returning home in 1926, he embarked on a tremendous literary outburst, and over the next ten years wrote many of the stories that have ensured his literary immortality. *Lord of a Visible World* is a riveting compilation that not only paints a full portrait of Lovecraft's life, writings, and philosophical beliefs, but features the piquant and engaging prose characteristic of his letters. In this new edition, the editors have updated all references to current editions of his work and also exhaustively revised their notes and commentary.

A provocative and inspiring look at the future of humanity and science from world-renowned scientist and bestselling author Martin Rees. Humanity has reached a critical moment. Our world is unsettled and rapidly changing, and we face existential risks over the next century. Various outcomes—good and bad—are possible. Yet our approach to the

future is characterized by short-term thinking, polarizing debates, alarmist rhetoric, and pessimism. In this short, exhilarating book, renowned scientist and bestselling author Martin Rees argues that humanity's prospects depend on our taking a very different approach to planning for tomorrow. The future of humanity is bound to the future of science and hinges on how successfully we harness technological advances to address our challenges. If we are to use science to solve our problems while avoiding its dystopian risks, we must think rationally, globally, collectively, and optimistically about the long term. Advances in biotechnology, cybertechnology, robotics, and artificial intelligence—if pursued and applied wisely—could empower us to boost the developing and developed world and overcome the threats humanity faces on Earth, from climate change to nuclear war. At the same time, further advances in space science will allow humans to explore the solar system and beyond with robots and AI. But there is no “Plan B” for Earth—no viable alternative within reach if we do not care for our home planet. Rich with fascinating insights into cutting-edge science and technology, this accessible book will captivate anyone who wants to understand the critical issues that will define the future of humanity on Earth and beyond.

Prehistory

Prehistory describes the earliest ages of human life in India, long before the existence of written records. It is part of a larger project, a People's History of India. In this monograph, the style is sought to be kept simple without making it 'popular', rhetorical or inexact. Chapter 1 treats in brief the geological formation of India, and changes in its climate and natural environment in so far as these relate to an understanding of our prehistory and history. Chapter 2 provides the story of man, first in the global context and then in India. Chapter 3 describes the coming of agriculture and the beginnings of exploitative relationships. Technical or controversial matters that need special attention are dealt with in notes appended to each chapter.

The only translation that shows the original Chinese with a transliteration of each character side-by-side with the English sentence translation. Includes a glossary explaining Sun Tzu's definitions of the key Chinese concepts. There are many translations of *The Art of War*, but this is only truly accurate version written by America's leading expert on Sun Tzu's system. Winner of the Independent Publishers Book Award for the best Multicultural Nonfiction book of the year! Seven Ways Better Than All Other Translations!

1. More complete: Based on the complete compilation of all historical sources and academic research rather than on traditional fragmentary sources.
2. More accurate: Shows the original Chinese phrases (thousands of characters), individually translates each character (a transliteration), translates each phrase into an English sentence, and provides details of the key concepts that cannot be translated.
3. More concise: Its side-by-side format makes it impossible to add or subtract from the Chinese source or secretly add the translator's editorial opinions. All commentaries are clearly separated from the translation and text.
4. More authoritative: Translated by America's leading expert on Sun Tzu, who has written over two dozen books explaining the strategic concepts in the text.
5. More consistent: Eliminates the imprecise word choices that create the obvious internal contradictions so common in most other translations.
6. More balanced: Offers one English sentence for each Chinese phrase to preserve the balance of ideas in the original work.
7. More organized: Retains and numbers the original phrase groups to preserve the contextual relationships for easy study. You can compare this version to other translations and immediately see where other English translation depart from the original Chinese into the translators' own opinions and commentaries. This version won the award not just for being the best translation or the best book about Asian philosophy, but the best of all books in 2003 explaining another culture anywhere in the world. Much more than a history atlas, this book drops you right in the heart of the action, as 130 detailed maps tell the story of pivotal episodes in world history, from the first human migrations out of Africa to the race for space. After the foreword written by renowned broadcaster and historian Peter Snow, purpose-made regional and global maps present the history of the world as it happened, charting how events traced patterns on land and ocean - patterns of exploration, discovery, or conquest that created powerful empires, fragile colonies, or terrifying theatres of war. An interplay of text and graphics leads you around the page so that you can follow the story of civilizations through ancient, medieval, and modern times. But not every page is full of maps. At key points in History of the World Map by Map, broad, sweeping introductions provide a chance to step back and look at entire periods, such as World War 2, or to explore overarching themes, such as the Industrial Revolution. Picture spreads, meanwhile, focus on epoch-defining moments or developments, such as fascism and communism, and the invention of printing.

The Wall Chart of World History

Juicy Jasmine Larson Bush is at it again -- battling her past in order to save her future. With her own lies, she nearly destroyed her marriage to Pastor Hosea Bush. Why, Jasmine was forced to reveal every secret she'd ever kept from her husband, right down to her real age, weight, and shoe size! She thought she had told Hosea everything. But when Jasmine is blackmailed with a terrible truth from her past that she "forgot" to tell Hosea, more than just her marriage is in jeopardy. Surprisingly, her first instinct is to tell the truth. Jasmine knows, however, that this is one part of her life that can never be exposed. Determined to keep the life she fought so hard to save, Jasmine is willing to commit any sin -- even murder -- to leave her past behind her. No one can know the truth about the First Lady of City of Lights at Riverside Church. No one can know that beneath the veneer of a redeemed Christian wife, there lies a sinner -- especially not her trusting husband.
